SWIPE

LIVE SERVER

By Ritwick Dey

☆ 4.5 ↓ 67M

ritwickdey.LiveServer

Quickly launch a development web server, with support for automatic live reloading.

Very helpful for HTML prototyping.

```
index.html x
index.html > html > body > h1
2 <html lang="en">
4 <head>
21 <link
22 href="https://fonts.googleapis.com/css?family=Roboto"
23 rel="stylesheet" />
24 </head>
25
26 <body>
27 <h1>Hello</h1>
28 </body>
29
30 <script src="script.js"></script>
31
32 </html>
```

Hello

2

REMOTE DEVELOPMENT

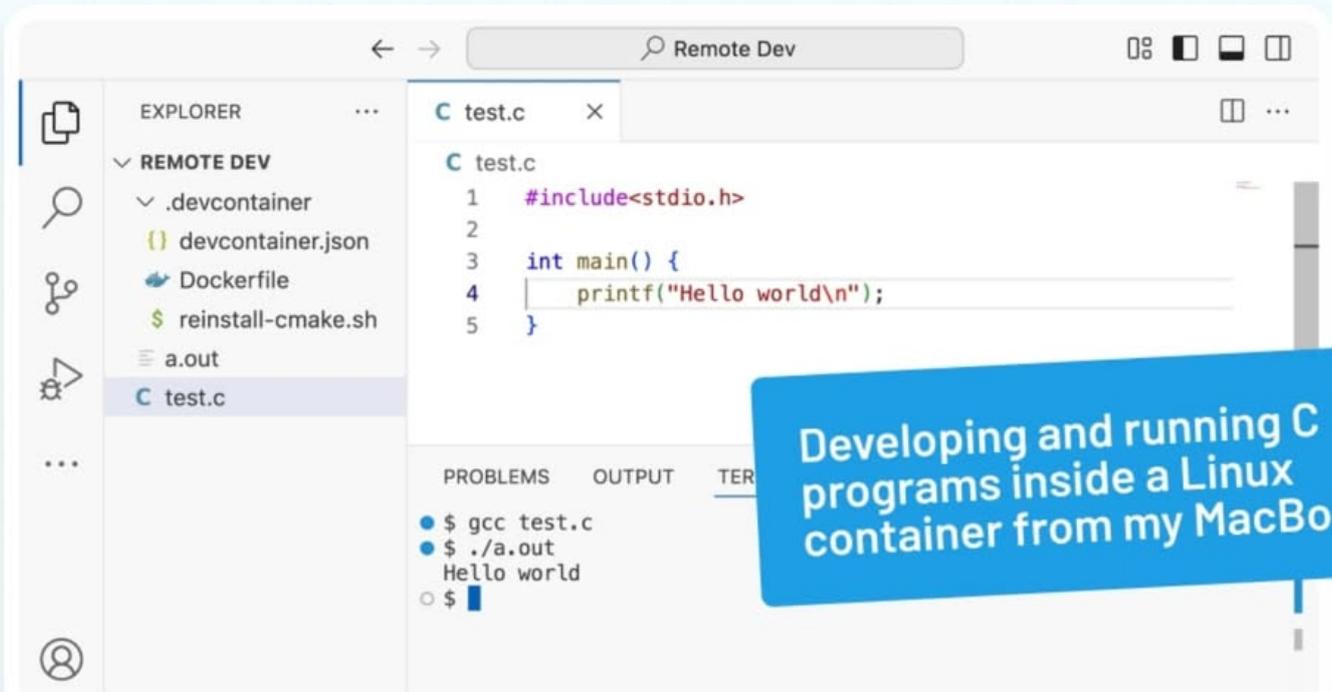

My daily go to.

I use DevContainers a lot – a containerised dev setup. You can also SSH into any remote machine and explore from the editor itself.

MERMAID CHART

VS Code support for Mermaid.js - a diagramming tool based on plain text! You can generate flowcharts, sequence diagrams, etc, without needing to leave the editor.

By Mermaid

☆ 4 ↓ 175K

MermaidChart
.vscode-mermaid-chart

```
1 sequenceDiagram
2   participant Alice
3   participant Bob
4   Alice->>John: Hello John, how
5   loop HealthCheck
6     John->>John: Fight against
7   end
8   Note right of John: Rational
9   John-->>Alice: Great!
10  John->>Bob: How about you?
11  Bob-->>John: Jolly good!
```

The rendered diagram shows three participants: Alice, Bob, and John. Alice sends a message to John: "Hello John, how". John enters a loop labeled "HealthCheck" where he sends a message to himself: "Fight against". A note on the right of John says "Rational thoughts prevail!". John then sends a message to Alice: "Great!". John sends a message to Bob: "How about you?". Bob sends a message to John: "Jolly good!".

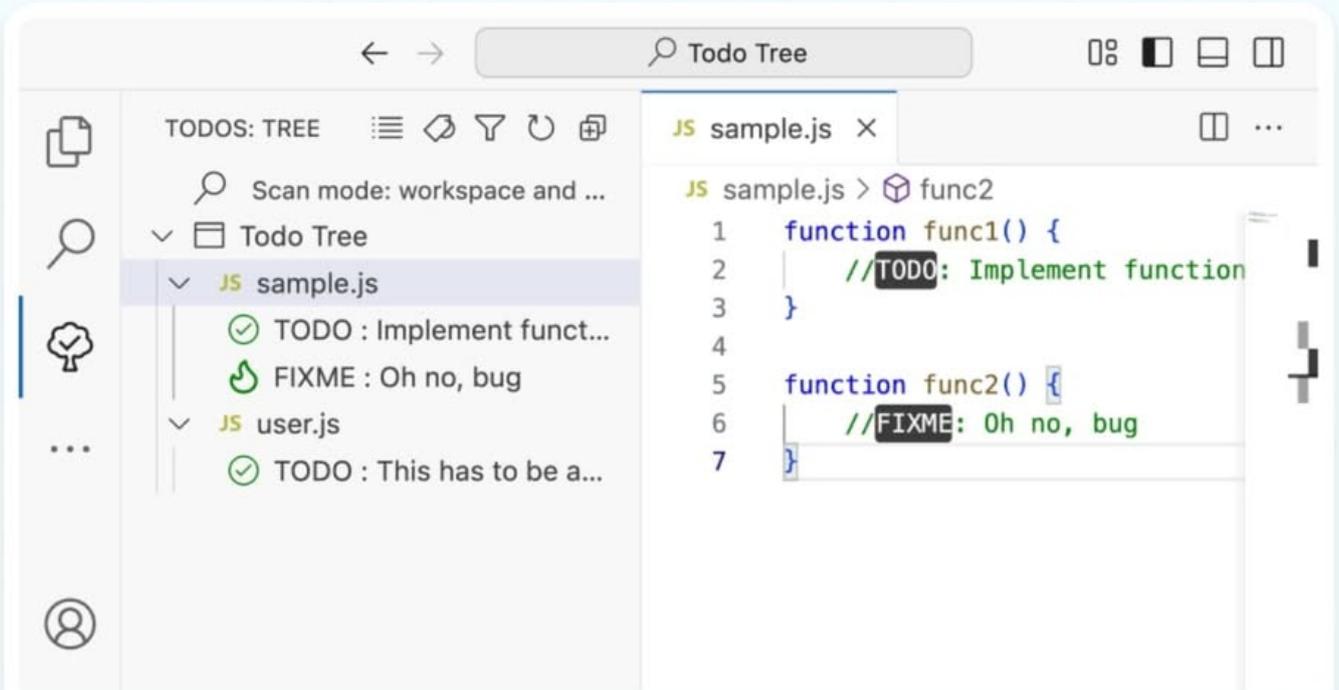

TODO TREE

Scans for **TODO:** and **FIXME:** comments throughout your project and lists them in a panel
